Writing an electronics resume yourself can be quite a challenge. So how do you make sure your resume isn't just an average bear tool? The best thing to do is to go through some example electronic resume templates before you start writing your own. Each trial RESUME is a perfect guide that will help you write your resume templates better, even if you do it for the first time. These templates will help you understand what employers expect to see in professional CVs. 47+ FREE RESUME Templates - Now Download Microsoft Word (DOC), Adobe Photoshop (PSD), Adobe InDesign (INDD & IDML), Apple Pages (MAC), Microsoft Publisher, Adobe Illustrator (AI) Electronic Technician Cv template to edit free downloadElectronic Technician Resumeweb.iit.ac.inDetailsFile FormatSize: 14.6 kBDownloadEver part of this RESUME should be good enough to give you a heads up on what a good resume for electronic technicians should look like. It's not just available for free; it is also easy to customize. You can also see Construction Resume Template, Electronic Engineer Resumeprofile.sabanciuniv.eduDetailsFile FormatSize: 40.1 kBDownloadElectronic nerds seriously looking for jobs can use this template to learn how to write good Resumes. Your CV needs to read well, which means you should save enough time to write and proofread your resume. Aviation Electronic Technician Resumecentennialcollege.caDetailsFile FormatSize: 138.8 kBDownloadIf you love working in the airline field and have what it takes to be an aviation technician, you should be comfortable enough to use this template for CV writing. It is 100% customizable and easy to edit. Power Electronic Resumengineering.asu.eduDetailsFile FormatSize: 23.5 kBDownloadIf you are ambitious and have what it takes to work in your energy company, consider using this template as your personal guide for CV writing. The template has everything you need to write a good CV. Telecommunications technician Resumexa.ying.comDetailsFile FormatSize: 14.7 kBDownloadIf you want to write a sharp, premium resume that will attract the attention of potential employers, consider using this template. The model is for professionals who have experience as telecommunications technicians. Experience Electronic Engineer Resumerezayat-commercial.comDetailsFile FormatSize: 13.1 kBDownloadProfessional Electronic Engineer Resumeyu.edu.joDetailsFile FormatSize: 19.4 kBDownloadElectrical and Electronic Engineer Resumekjut.ac.keDetailsFile FormatSize: 9.8 kBDownload> What should you include in Electronics Cv? It is important to understand that the significant information to be included in an electronics CV will vary from person to person. Overall, what you're going to add depends on three things: career plans, your education level, skills and experiences, and the job you're targeting. For example, a person who writes an electronics RESUME at the start level will have completely different information than a person who has over ten experience under the belt for the same job. First and foremost, the cv will have four parts: basic summary, education, experience section and competence section. Describe all the parts as much as you can, and make sure you only provide valuable and relevant information. You can also see Project Manager Cv Template.> Electronics Resume TipsBring to outline past careers and experiences in chronological order. Arranging your skills in this order means putting them in a rising or descending order, but the former is often the most likely mode of arrangement. Your order is best if you've had a well-defined, industry-focused timeline. You can also see Retail Resume Template Arranging your experiences in this way puts them in an order that makes the document easy to read. Some authors choose the functional format instead of the chronological. It is the best option for those who want to keep their resumes short and focused.> Errors to avoid in electronics ResumeDo not combine both functional and chronological formats in a resume. Select only one format and use it to create a good outline. Another common problem for many RESUME writers is the tendency to make the document quite too long. It's important to keep your resume short because doing it longer than necessary is actually unnecessary. Don't forget to proofread your resume. The document must be perfect, and the only way to make sure it reads well is to remove any instance of grammar error when proofreading. You can also see Engineering Cv Templates. The most important to remember is that a resume is not going to win you a job, no matter how perfect it reads. A RESUME is a tool that can only win you an interview. Write it well; make sure that it is interesting to read, so that a potential employer will not have difficulty reviewing the document. An electronics engineer will be responsible for posting, designing, testing, troubleshooting and modifying electronic products. Electronic engineering should also be skilled in applying the principles and theories of electronics. He should have knowledge of electrical and electronic engineering, digital signal processing, telecommunications, optoelectronics and other relevant disciplines. Sample #1 Kenneth Jones 6901 West Main 26 street, North Cleveland, TX, 77327 (555)-555-5555 [email] Aims to be able to work in a highly organized environment and contribute to my expertise and knowledge in electrical processes and applications such as design, testing, editing and modification of electrical equipment. Education MS Electrical Engineering, 2006 Yale University BS Electrical Engineering, 2002 Yale University Skills: Long experience in inspection of electronic devices. Detectable HSEC knowledge and skills Effective contributor strikes deadline and targets knowledge of safety issues, major accidents and hazards Analytical skills to follow the logic of electronic circuits and interfaces with software Good Skills Professional Experience: Electronics Engineer, 2008-present Crane Electronics, North Cleveland Responsibility: Designed, built and installed electrical instrumentation systems in a variety of projects. Conducted surveys to determine the condition of existing systems and made recommendations for further improvement. Prepared requirements for improvement and change of work and procedures. Designed pressure systems and structural pipelines for a client company. Telecom Technician, 2003-2007 GSM Telecom, Austin Liability: Tested equipment and machine tools and reported any discrepancies. Assisted electrician with project management and budget proposals. Trained and monitored assistant electricians in all divisions about the proper handling and installation of electrical equipment. Reported daily to the chief electrician and kept him informed of the status of all areas of responsibility. Electrical Design Engineer, 2002-2003 Turbo Appliances, Chestertown Responsibility: Designed, built and installed electrical instrumentation systems in a variety of projects. Conducted surveys to determine the condition of existing systems and made recommendations for further improvement. Prepared requirements for improvement and change of work and procedures. Designed pressure systems and structural pipelines for a client company. Telecom Technician, 2003-2007 GSM Telecom, Austin Certifications and Affiliations Certificate in Electric Schematic Capture CAD Institute of Electrical Engineers, Member Sample #2 Michael Byrne 2834 Monica Ct SW Albany, NY 12201 (555)-555-5555 [email] Summary An ECE graduate who is involved in the invention, design, construction and operation of electronic systems and devices; working in various segments of the communication industry, automotive or in robotics; specializes in electrical circuits in endless applications and is involved in development research efforts to update the technology; have often worked with computing systems, industrial equipment, aerospace equipment or biomedical devices; has a solid foundation in research, design and development, production, service and sales. Professional Experience: Off Highway Electronics Engineer January 2007 - Present Armadillo Metalworks, Inc., Albany, NY Responsibility: Handled integration of software components and provided software releases to support calibration, engine performance and product development. Validated the development of platform-specific software code, software parameter definition, and software verification to meet QA standards. Supported design reviews and the development of Error Mode effect analysis and design validation planning and review programs. Supported bench, motor test cell, and vehicle controls validation and troubleshooting required by regulatory standards. Power Electronics Engineer May 2004 - December 2006 Pearce Engineering, Limited, Albany, NY Education Masters Degree in Electronics and Communication Engineering University of Iowa, IA, 1999 Bachelor's Degree in Electronics Rockefeller University, NY, 1997 Skills: Identified complex problems and review of solutions Excellent communication, assessment and evaluation skills Good time management and coordination skills Knowledge in training and testing equipment Extensive work experience in writing test cases based on requirements Awards and Affiliations: Institute of Electrical and Electronic Engineers, member Student Association of Graduate Engineers, member Michael Calhou 4465 Charack Road Washington, IN 47501 (555)-555-5555 [email] Job goals To secure an electronics engineering position in a fast-growing company where my expertise can help the organization achieve its goals. Work experience: Electronics engineer, August 2005 - Present Ingersoll Rand, Washington, IN Answered all questions about power electronics, served as a specialist. Maintained and designed system hardware and necessary control algorithms. Managed the products and designed them to meet all the specified standards of environment and material regulations. Operated on material and components obtained from reputable suppliers and designed products. Supported technical specifications in design and ensured that the customer's requirements were met. Coordinated with other departments such as firmware developers and provided an interface for the product. Ensured that all product packages work in accordance with the product requirement. Supported the production team based on the sales people and customer feedback. Electronics Engineer, May 2000 - July 2005 Ventus Networks, Washington, IN Performed tests and developed HVAC for housing. Prepared electronic and analog circuits, digital logic and microcomputer and performed tests on them. Ensured that all products are designed and tested accurately. Coordinated with the suppliers and provided support to the production team. Given support to the production and design team, the electronic hardware and their specification developed. Assisted the other departments and prepared validation documents, such as validation test plans. Qualification summary: Remarkable experience in designing high-power electronics Audio knowledge of electronic hardware design and life cycle Tremendous ability to solve all electronics engineering problems in the design process Good skills to maintain electrical safety standards in the facility Skilled in performing electronic tests Deep knowledge of the design of battery chargers and PCB In-depth knowledge of IPC criteria and standards (PCB, PCBA, Wire and Harness) Exceptional ability to work with electronic suppliers for the collections Familiarity with ISO 9001 and 13485, quality management system requirements that are skilled at using MATLAB, Analog, Digital, CAD, Test Engineering and Integrated Circuits Education Bachelor's Degree in Electrical Engineering, US Army War College, Carlisle, PA Nelson Jarod 1001 West Van Buren Chicago Illinois 60607 (555)-555-5555 [email] Objective Seeking for a challenging role in electronics where I can use my skills for the growth of the organization. Technical skills: Electronic circuits and integrated circuits design Telecommunications Mobile technology Microprocessors and control design and analysis Other skills: Computer language: C, C++, HTML, operating systems: Windows 98/2000/XP Effective human relations and teamwork skills Professional Experience: Thompson Electronics Company, Illinois. Electronics Engineer, from August 2008 to date Installed, repaired and maintained electrical and electronic related equipment. Designed and tested electronic circuits. Conducted multifaceted research. Tested mobile and wireless communication devices using automated test equipment. Maintained the design of the existing product. Jemco Engineering Company, Illinois Electronics Engineer, from May 2006 to June 2008 Troubleshoot and maintained electronic and electrical equipment. Tested circuits for TV, vcrs and stereo equipment. Developed and tested integrated electronic systems. Designed fault detectors. Education University of Illinois, Urbana-Champaign, March 2006 BS in Electronics and Communications Engineering, with 3.35 GPA achievements and honorary member of the Illinois Society of Professional Engineers. Member of the IEEE. Member of the American Association of Electronics Engineers. Callie Marcella 1234 East 69 Street West Van Buren Chicago Illinois, 60697 (555)-555-5555 [email] Goals To get an entry level electronics engineering position in a dynamic organization. Technical skills: Electronic circuits and integrated Design Telecommunications Mobile Technology Microprocessors and Control Design and Analysis Other Skills: Computer Language: C, C++, HTML Operating Systems: Windows 98/2000/XP Effective Human Relations and Teamwork Skills Related Experience: Trained in Analog Modeling and Simulation Tools. Trained in electronics and built-in systems architecture design. Developed, designed and tested electronic components and products. Maintained and repaired electrical and electronics equipment. Education University of Illinois, Urbana-Champaign, March 2006 BS in Electronics and Communications Engineering, with 3.35 GPA achievements and honorary member of the Illinois Society of Professional Engineers. Member of the IEEE. Ieee.
